

Swiftflitz Car Rental Management System Pricing Proposal

Custom Web Application Development

Prepared For: Swiftflitz Car Rental

Prepared By: Ordaq Tech Solutions

Date: January 21, 2026

Valid Until: February 21, 2026

Proposal Reference: ORDAQ-SF-2026-001

Project Timeline: 8 Weeks

EXECUTIVE SUMMARY

Ordaq Tech is pleased to present this proposal for the development of a comprehensive car rental management system for Swiftflitz. This custom-built Laravel application will streamline your fleet operations, enable online customer bookings, and provide powerful administrative tools for complete business oversight.

The system consists of two primary components: a public-facing website for customer interactions and an administrative panel for internal operations management. This solution is designed specifically for the Ghanaian market with local payment integration and business practices in mind.

ABOUT ORDAQ TECH

Ordaq Tech is a Ghana-based technology company that delivers exceptional web and software solutions. We specialize in custom development that empowers Africa businesses to compete globally. Our mission is to build digital platforms with precision, speed, and professionalism that meet international standards while understanding local market needs.

PROJECT SCOPE & FEATURES

SYSTEM OVERVIEW

The Swiftflitz Car Rental Management System will be a full-stack web application built using Laravel framework, providing comprehensive tools for managing your car rental business operations from end to end.

1. PUBLIC WEBSITE

1.1 Vehicle Display & Catalog

- ✓ Comprehensive vehicle catalog with high-quality image galleries
- ✓ Detailed vehicle specifications (make, model, year, transmission, fuel type, seating capacity)
- ✓ Vehicle features and amenities display
- ✓ Flexible pricing display (can be shown or hidden per vehicle by admin)
- ✓ Real-time availability status
- ✓ Vehicle categorization (economy, luxury, SUV, etc.)

1.2 Search & Filtering

- ✓ Advanced search with multiple filter criteria
- ✓ Filter by vehicle type, price range, seating capacity, transmission type
- ✓ Date-based availability filtering
- ✓ Real-time filter results without page reload
- ✓ Sorting options (price, popularity, newest vehicles)

1.3 Dual Booking System

- ✓ Direct Booking (for vehicles with visible pricing): Full online booking with automatic cost calculation
- ✓ Quote Request (for vehicles without public pricing): Reservation request system

- ✓ Customer information collection (name, contact, email, license details)
- ✓ Date and time selection for pickup/return
- ✓ Airport pickup/drop-off options
- ✓ Automated email confirmations
- ✓ WhatsApp notifications to admin

1.4 Additional Pages

- ✓ About Us, Contact page with form
- ✓ Terms & Conditions, Privacy Policy
- ✓ FAQ section, Rental policies
- ✓ Customer testimonials, Newsletter subscription
- ✓ Fully responsive design (mobile, tablet, desktop)

2. ADMINISTRATIVE PANEL

2.1 User Management & Access Control

- ✓ Role-based access control (RBAC) with custom roles
- ✓ Administrator role and extensible custom role creation
- ✓ Granular permissions for different system modules
- ✓ User activity logging for accountability
- ✓ Secure authentication with password requirements and reset functionality

2.2 Vehicle Management

- ✓ Complete vehicle inventory system with all specifications
- ✓ Multiple image upload and gallery management
- ✓ Flexible pricing configuration (daily, weekly, monthly rates)
- ✓ Toggle to show/hide pricing on public website
- ✓ Vehicle condition notes and maintenance history
- ✓ Insurance information storage
- ✓ Manual availability override for vehicle swaps

2.3 Rental Management

- ✓ Create new rentals with complete customer information
- ✓ Customer database with driver's license and ID details
- ✓ Rental details: pickup/return dates, locations, duration
- ✓ Pricing calculations with additional charges (insurance, extras)
- ✓ Deposit tracking and payment status management
- ✓ Vehicle condition documentation at pickup (photos, videos, mileage, fuel level)
- ✓ Manager assignment for accountability
- ✓ Rental agreement/contract generation

2.4 Rental Status Workflow

- ✓ Pending: Booking created but not confirmed
- ✓ Rented: Vehicle currently with customer
- ✓ Returned: Vehicle returned, pending admin approval
- ✓ Completed: Rental approved and closed after inspection
- ✓ Overdue: Vehicle not returned by expected date

2.5 Vehicle Return Process

- ✓ Return approval workflow requiring manager inspection
- ✓ Return condition documentation (mileage, fuel level comparison)
- ✓ Damage reporting with photo uploads and cost estimates
- ✓ Additional charges application (cleaning, damage, late fees)
- ✓ Automatic vehicle availability restoration upon approval
- ✓ Return inspection report generation

2.6 Dashboard & Reporting

- ✓ Real-time dashboard with key business metrics
- ✓ Fleet statistics (total vehicles, rented, available, overdue)
- ✓ Revenue analytics (daily, weekly, monthly)
- ✓ Manager performance reports and booking reviews
- ✓ Vehicle utilization and revenue per vehicle reports
- ✓ Financial reports (outstanding payments, deposits, repair costs)
- ✓ Customer rental history and repeat customer tracking
- ✓ Export functionality (PDF and Excel)

2.7 Notifications & Alerts

- ✓ Real-time notifications for new bookings and quote requests
- ✓ WhatsApp Business API integration for critical alerts
- ✓ Email notifications for confirmations and reminders
- ✓ Upcoming return reminders (24 hours before)
- ✓ Overdue rental alerts

- ✓ Maintenance requirement notifications

TECHNICAL SPECIFICATIONS

- ✓ Backend Framework: Laravel (latest stable version)
- ✓ Database: MySQL
- ✓ Frontend: Modern responsive design with Vue.js/Blade
- ✓ File Storage: Support for images and video uploads
- ✓ Security: CSRF protection, SQL injection prevention, XSS protection, HTTPS enforcement
- ✓ Performance: Optimized queries, image optimization, caching implementation
- ✓ Integration: WhatsApp Business API, Email SMTP, Payment gateway ready

INVESTMENT & TIMELINE

PROJECT INVESTMENT

COMPLETE DEVELOPMENT PACKAGE

GHS 25,000
GHS 15,000

Custom Laravel Solution

✓ Friends & Family Discount Applied (Save GHS 10,000)

Special Discount Note

This pricing includes a GHS 10,000 discount as part of our close circle program. Standard market rate for a project of this scope and complexity would be GHS 25,000 on the low end. You're receiving premium custom development at a preferential rate.

WHAT'S INCLUDED

Deliverable	Description

Final Payment	Upon project completion and handover (Week 8)	30%	GHS 4,500
TOTAL PROJECT COST			GHS 15,000

PAYMENT METHODS

Mobile Money

MTN (+233) 546750886

Bank Transfer

Details provided upon request

PROJECT TIMELINE & TERMS

8-WEEK DEVELOPMENT TIMELINE

Phase	Duration	Key Deliverables
Phase 1	Weeks 1-2	• Project setup & architecture • Database design • Authentication system • Admin panel foundation
Phase 2	Weeks 3-4	• Vehicle management system • Public website development • Booking system (direct & quote) • Search & filter functionality
Phase 3	Weeks 5-6	• Rental management workflow • Return process & approval • Dashboard & reporting • Notification system
Phase 4	Weeks 7-8	• WhatsApp & email integration • Testing & bug fixes • Deployment to production VPS • Training & handover

Weekly Progress Updates

You will receive weekly progress reports via WhatsApp and email, and will have access to the development server to review progress in real-time throughout the project.

POST-LAUNCH SUPPORT

Your investment includes 2 weeks of comprehensive post-launch support:

- ✓ Bug fixes and error resolution
- ✓ Technical support via WhatsApp and email
- ✓ Minor adjustments and tweaks
- ✓ Performance monitoring assistance
- ✓ Answer questions and provide guidance

TERMS & CONDITIONS

1. **Proposal Validity:** This proposal is valid for 30 days from the date of issue (until February 21, 2026).
2. **Payment Terms:** Payments must be made according to the milestone schedule. Development will pause if payments are delayed beyond 7 days of the due date.
3. **Project Timeline:** The 8-week timeline begins upon receipt of the initial deposit and signed contract. Timeline may be extended if client feedback or required materials are delayed.
4. **Scope Changes:** Any changes or additions to the agreed scope after project commencement may result in additional charges and timeline extensions. We will provide a written estimate for any scope changes.
5. **Client Responsibilities:** Client must provide timely feedback, content, images, and any required materials within 48 hours of request. Client is responsible for obtaining and maintaining hosting, domain, and third-party service subscriptions.
6. **Intellectual Property:** Upon final payment, full source code and intellectual property rights transfer to the client. Prior to final payment, all work remains the property of Ordaq Tech.
7. **Support Period:** The 2-week post-launch support period begins from the date of project handover. Support includes bug fixes only; new features or major modifications are outside the support scope.
8. **Warranties:** We guarantee that the delivered system will function as specified in this proposal. We do not guarantee compatibility with future third-party service changes or updates made by the client after handover.
9. **Refund Policy:** Deposits are non-refundable once development has commenced. In the event of project cancellation, payment will be due for work completed up to the cancellation date.
10. **Liability:** Ordaq Tech's liability is limited to the total project cost. We are not responsible for any indirect, consequential, or incidental damages.

NEXT STEPS

To proceed with this project, please follow these steps:

1. Review this proposal and let us know if you have any questions or require clarifications.
2. Sign the contract (will be provided separately upon acceptance of this proposal).
3. Make the initial deposit of GHS 6,000 to commence development.
4. Provide initial materials including logo, brand colors, sample vehicle information, and any content you'd like included.

We're Excited to Work With You!

Thank you for considering Ordaq Tech for your car rental management system. We're committed to delivering a high-quality, professional solution that will streamline your operations and grow your business. We look forward to bringing the Swiftflitz vision to life.
